

Call For Tender Documents

Summary of the project - Supply and Installation of a lightweight temporary warehouse (B73.3)

This document provides a summary of the project for the Supply and Installation of a lightweight temporary warehouse (B73.3).

Supply and Installation of a lightweight temporary warehouse (B73.3)

Call for Nomination

Purpose

The purpose of this contract is to supply and install a lightweight warehouse on the ITER Site.

Background

ITER is a joint international research and development project aiming to demonstrate the scientific and technological feasibility of fusion power for peaceful purposes. The seven members of the ITER Organization are: The European Union (represented by EURATOM), Japan, the People's Republic of China, India, the Republic of Korea, the Russian Federation and the USA. The ITER Organization is located.

The construction of the ITER project is currently ongoing in Saint Paul lez Durance – France. In order to increase the storage capacity of components delivered to the ITER site by the Members, a new warehouse needs to be erected on the construction site. Given the temporary and urgent nature of the need, the solution of a prefabricated lightweight building has been adopted.

Scope of work

The selected contractor will be in charge of:

- Detailed design of works;
- Supply and erection of the warehouse of 100 x 25 x 11.5 m,
- Supply and installation of two large motorised doors of 12 x 8 m and 12 x 12 m (WxH),
- Supply and installation of building services (electricity, HVAC, fire detection), and
- Connection of the building to existing services.

The building shall be erected on an area with bitumen surface by means of ground anchors. The levelling and the finishing of the area is not in the scope of this contract.

Schedule

The tentative schedule is as follows:

- Issuance of combined prequalification / Call for Tender June 2020
- Tender submission deadline July 2020
- Contract award September 2020
- Completion of the Works December 2020

Experience

The Contractor shall be able to demonstrate that they can directly manage all the work described in this Call for Nomination.

The Contractor shall have at least one nominated person based full-time at the ITER Site during the works who is able to communicate effectively both verbally and in writing in English and prepare necessary documentation in English.

The Contractor shall be able to demonstrate that they have knowledge of French regulations related to Health, Safety & Environmental protection.

The Contractor shall be able to demonstrate adequate experience in the turn-key supply and site installation of pre-fabricated modular warehouses within short construction periods.

Candidature

Participation is open to all legal persons participating either individually or in a grouping (consortium) which is established in an ITER Member State. A legal person cannot participate individually or as a consortium partner in more than one application or tender. A consortium may be a permanent, legally-established grouping or a grouping, which has been constituted informally for a specific tender procedure. All members of a consortium (i.e. the leader and all other members) are jointly and severally liable to the ITER Organization.

The consortium groupings shall be presented at the pre-qualification stage. The tenderer's composition cannot be modified without the approval of the ITER Organization after the pre-qualification.

Legal entities belonging to the same legal grouping are allowed to participate separately if they are able to demonstrate independent technical and financial capacities. Candidates (individual or consortium) must comply with the selection criteria. The IO reserves the right to disregard duplicated reference projects and may exclude such legal entities from the pre-qualification procedure.
